Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The interview consisted of a discussion of the amendment of July 20, 2007 and an explanation by applicant regarding the auxiliary compressor of amended claim 12. Applicant pointed out that the prior art of Grant teaches an auxiliary compressor disposed above a surface under which a primary compressor of a downhole compressor operates. Applicant explained further that the instant application claims an auxiliary compressor disposed on a common rotor shaft with a primary compressor, both elements operating below a surface analogous to a surface that is taught by Grant. Applicant also discussed the flow pattern of gas within the downhole compressor with reference to figure 3 of the instant application.
